# FINAL EXAM

1. Create a wordpress project using MAMP.

ANS:- I have created the new wordpress as name of final exam.

2. Open the testsite to verify it is loading with default settings.
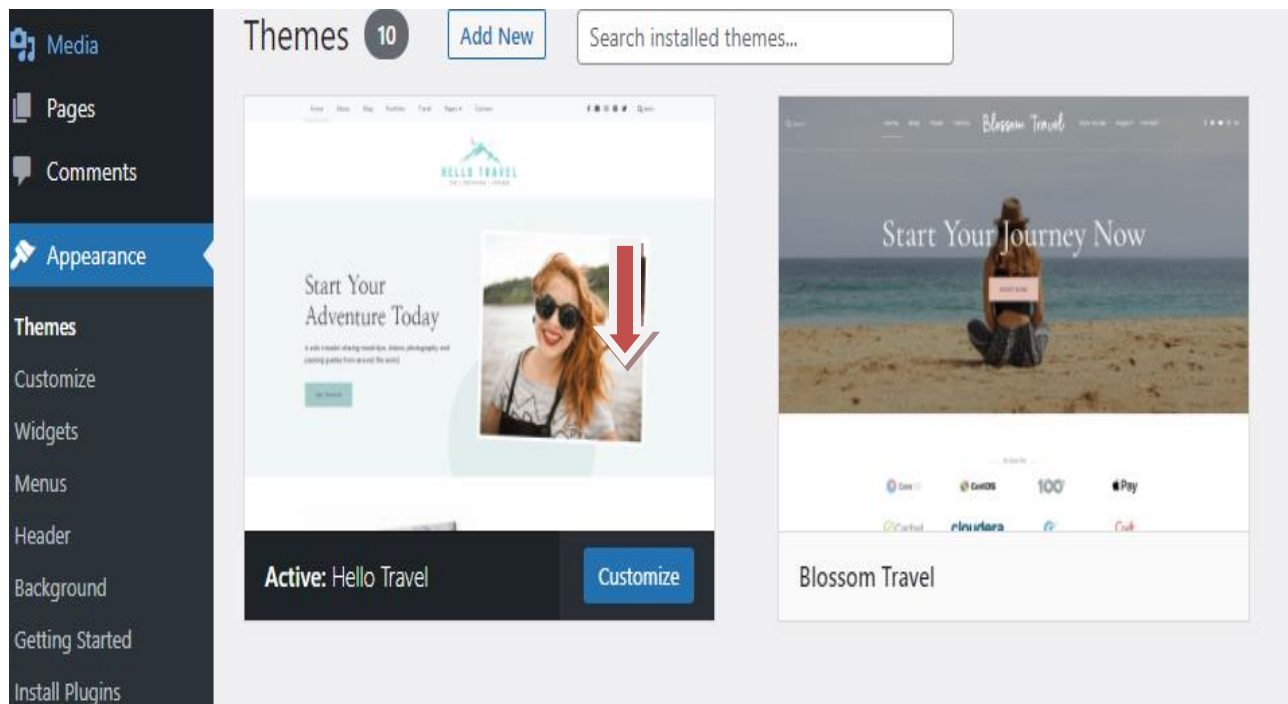

ANS: Here is the localhost link of my wordpress.

http://localhost/finalexam/wp-admin/index.php

3. Create a custom theme and activate it.

- Activate the new theme

- Customize the theme

4. Create 10 posts using Fakerpress.

Creating the post of fakerpress

Here 10 posts which are created in the fakerpress

Fakerpress posts result on mysite:-
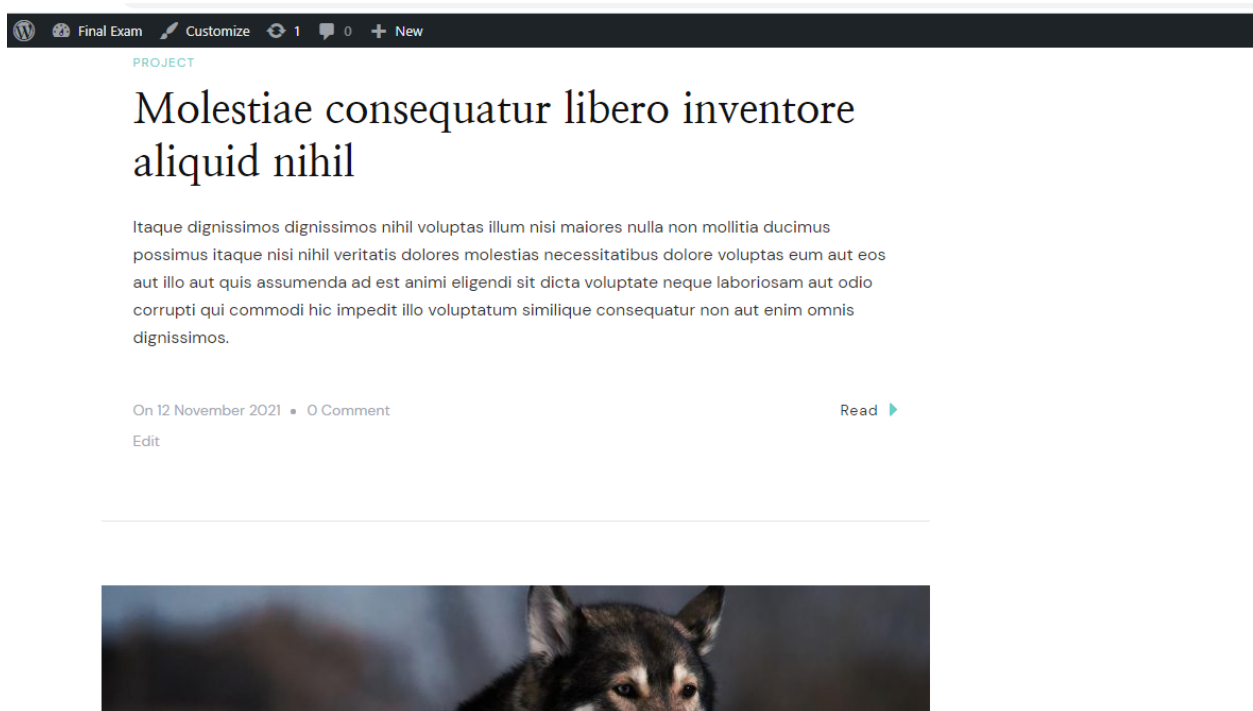

5. Create three pages namely Home, About US and Contact US.

These are the three pages Home about us, contact us
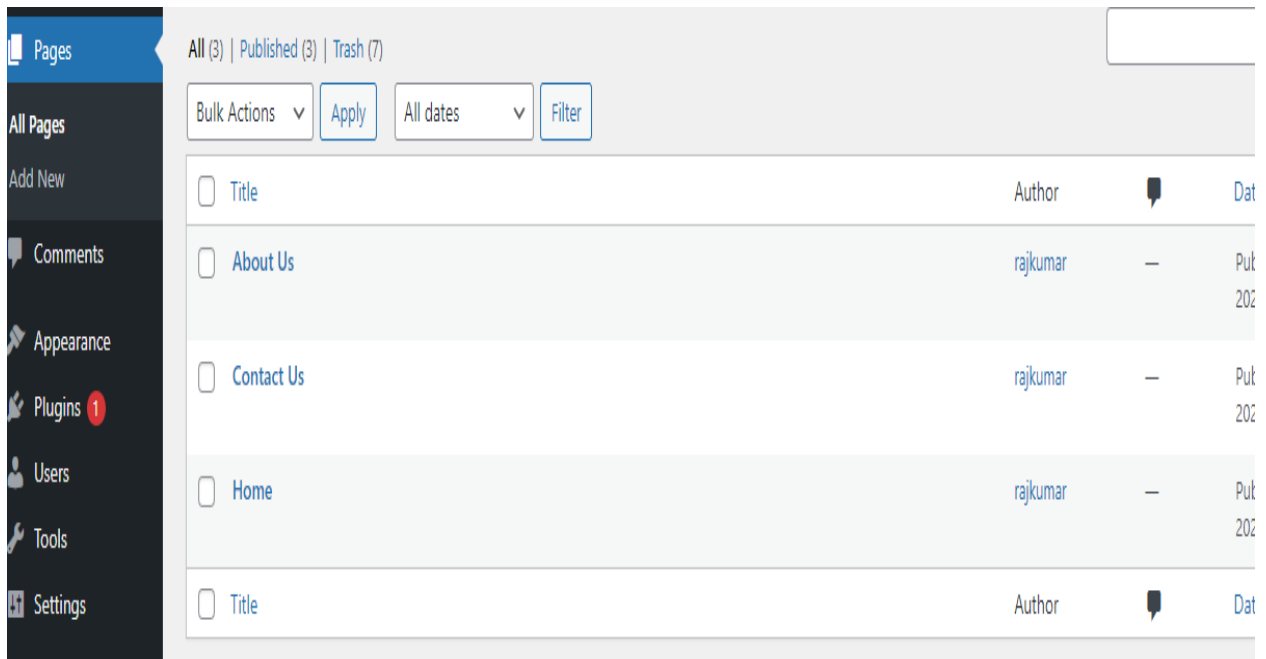

Result of these pages on mysite
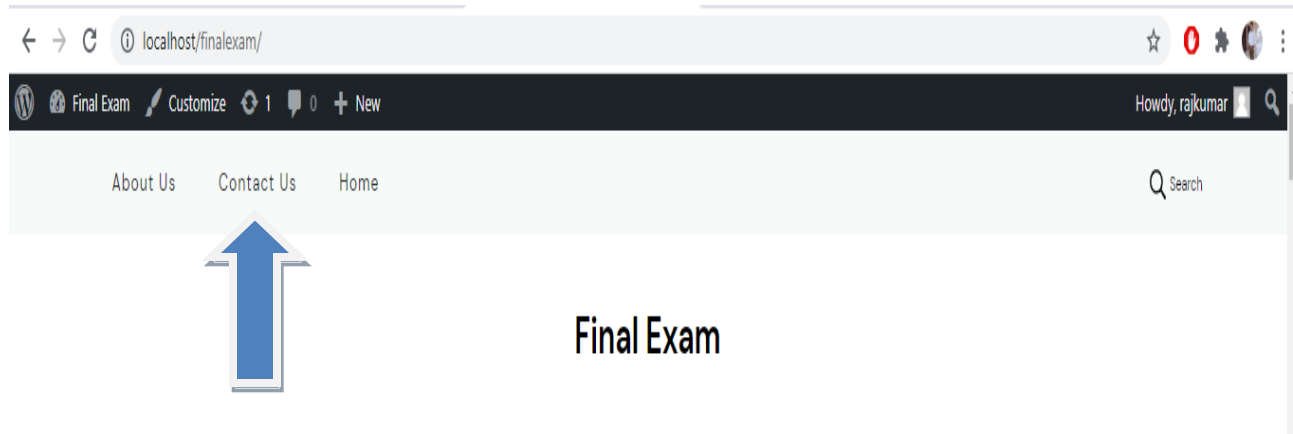

6. All the pages should have a header, footer respectively.

Header
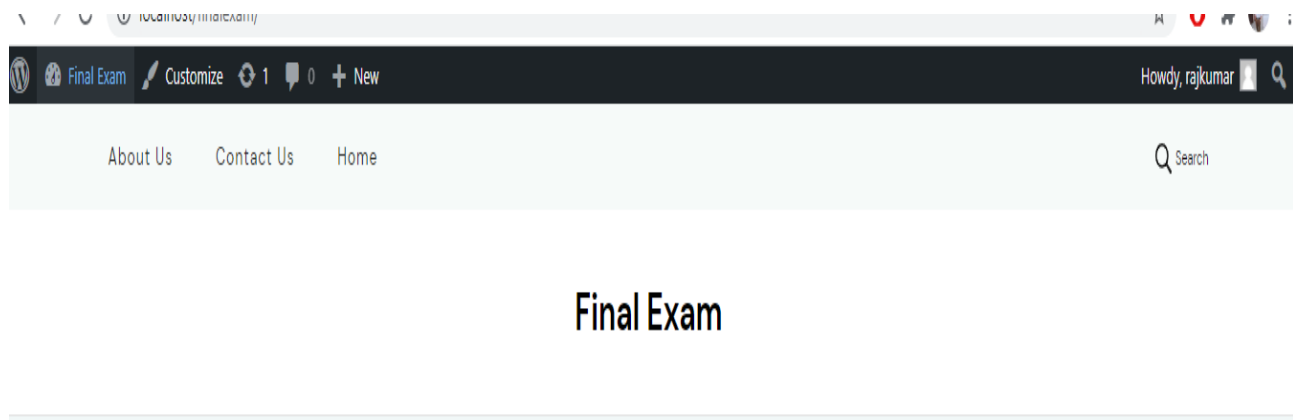

Footer
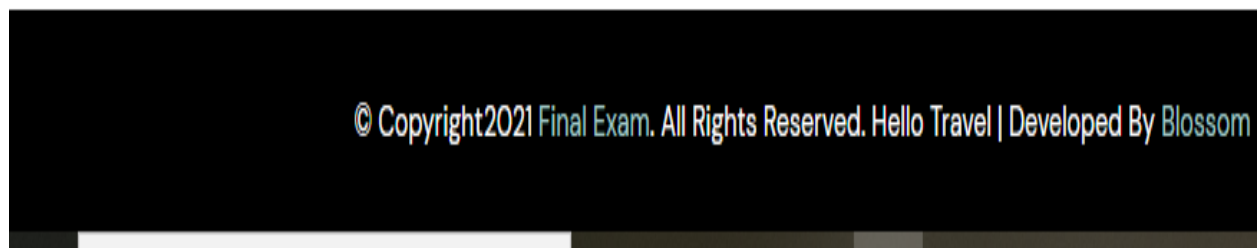

7. Give a logo to your page and integrate it.

I have add a logo for my site as a picture.

About Us   Contact Us   Home
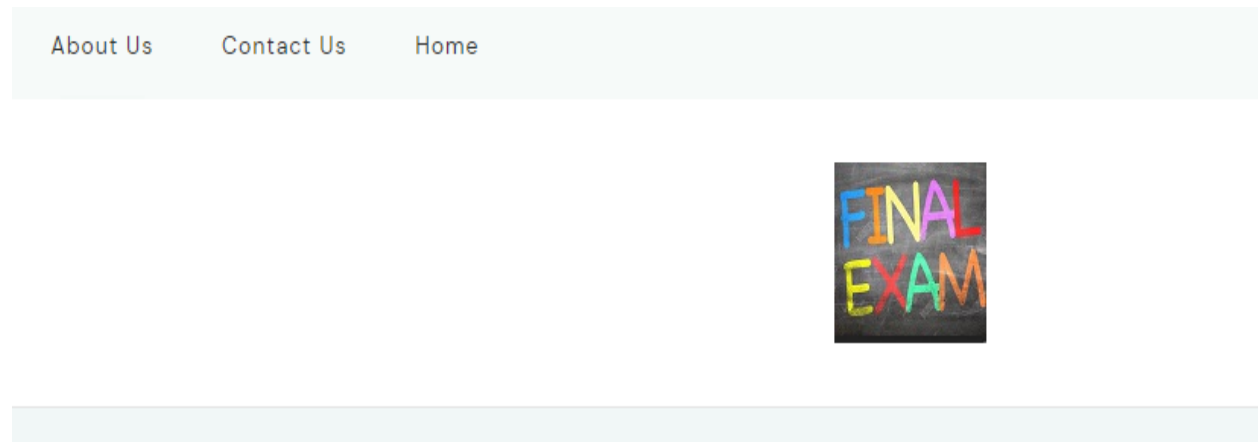

8. Create atleast two categories for your page's posts.

Ans:- I have created two categories as a name of exam and final exam

9. Have the 5 major template files integrated to your project.

There five template files for my project/final exam
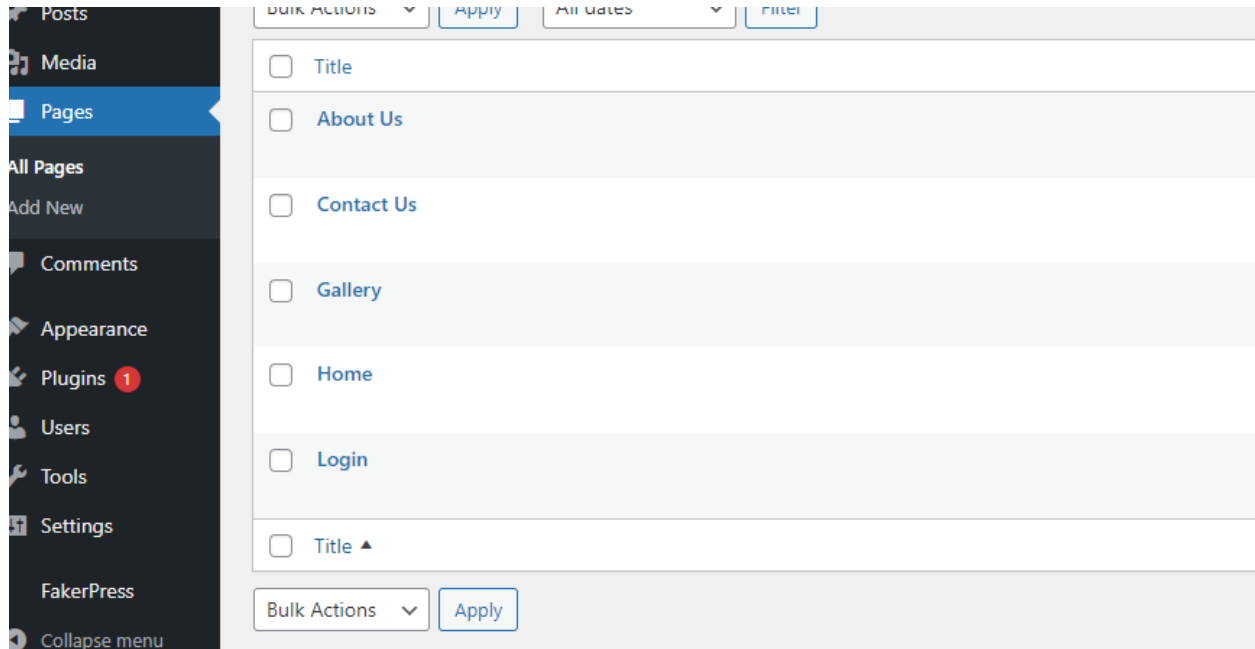

The output of these files on mysite.
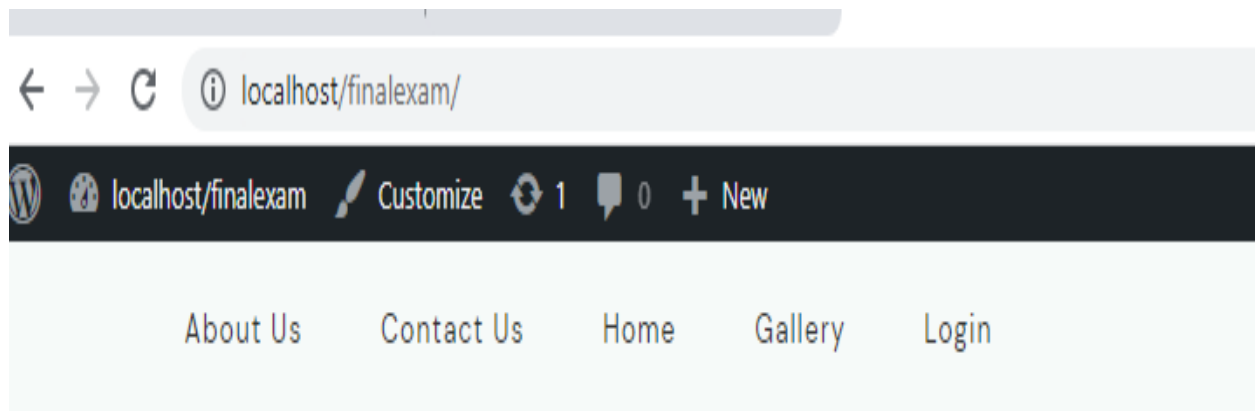

10. Change the homepage setting.
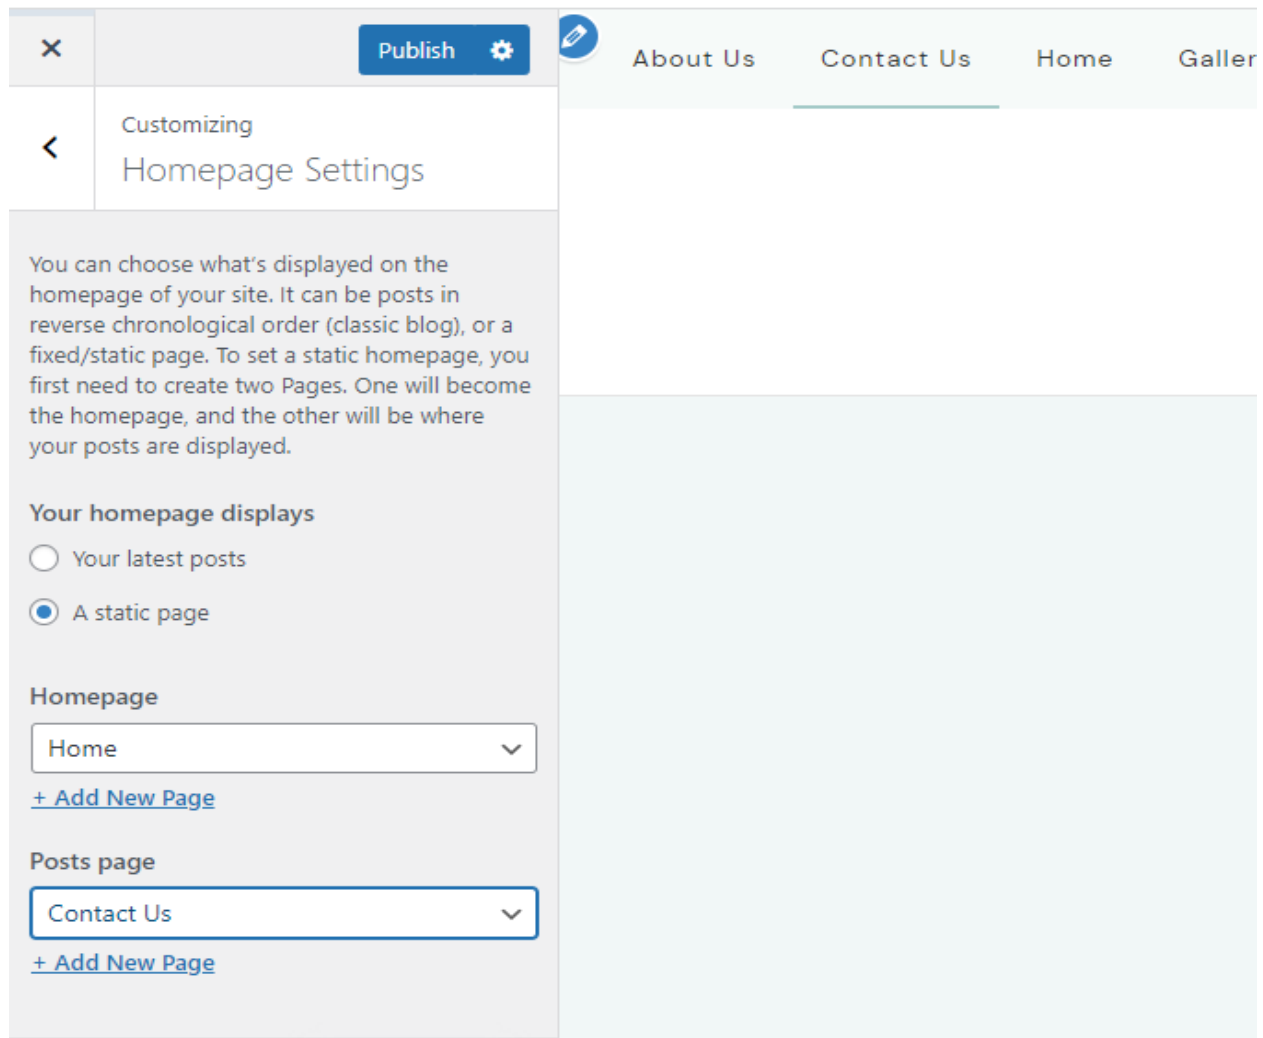

11. Edit the theme file by adding a custom css. Change atleast three different css properties.

➢ I have changed the header color gray to lightgray with rgba color

```
35  ========================*/
36  .header-four .header-t {
37      /*background: rgba(228, 191, 182, 0.1);*/
38      background-color: rgba(126, 128, 126, 0.7);
39  }
40
```

➢ I have changed the color and border width of cover picture.

Before
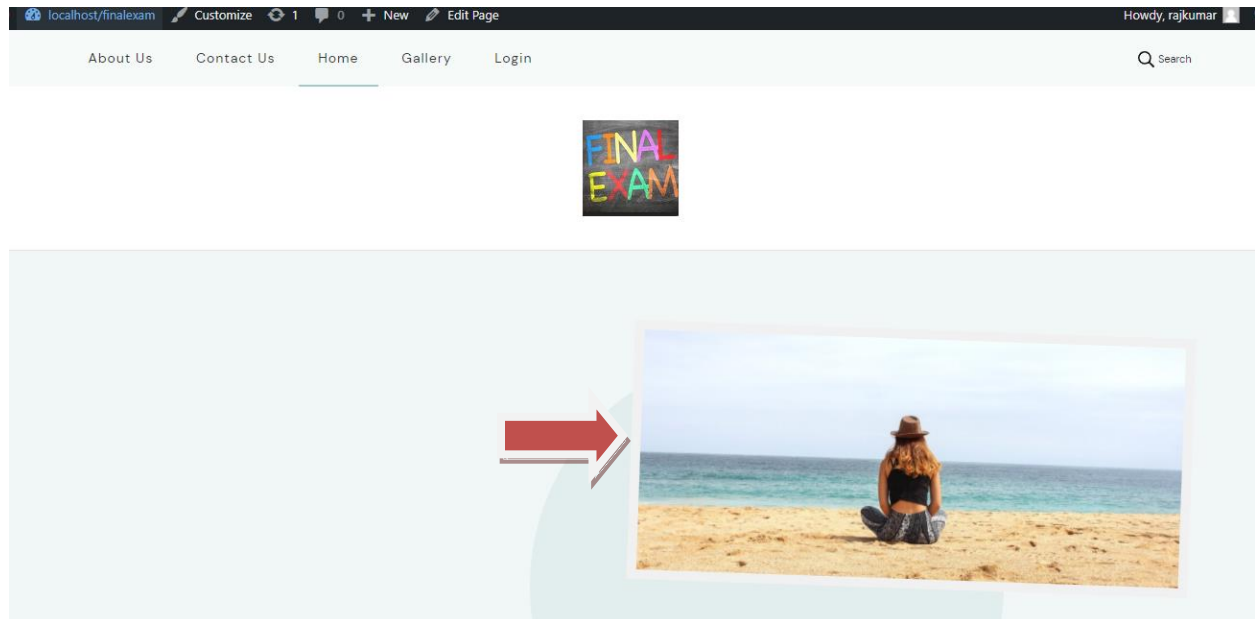

After
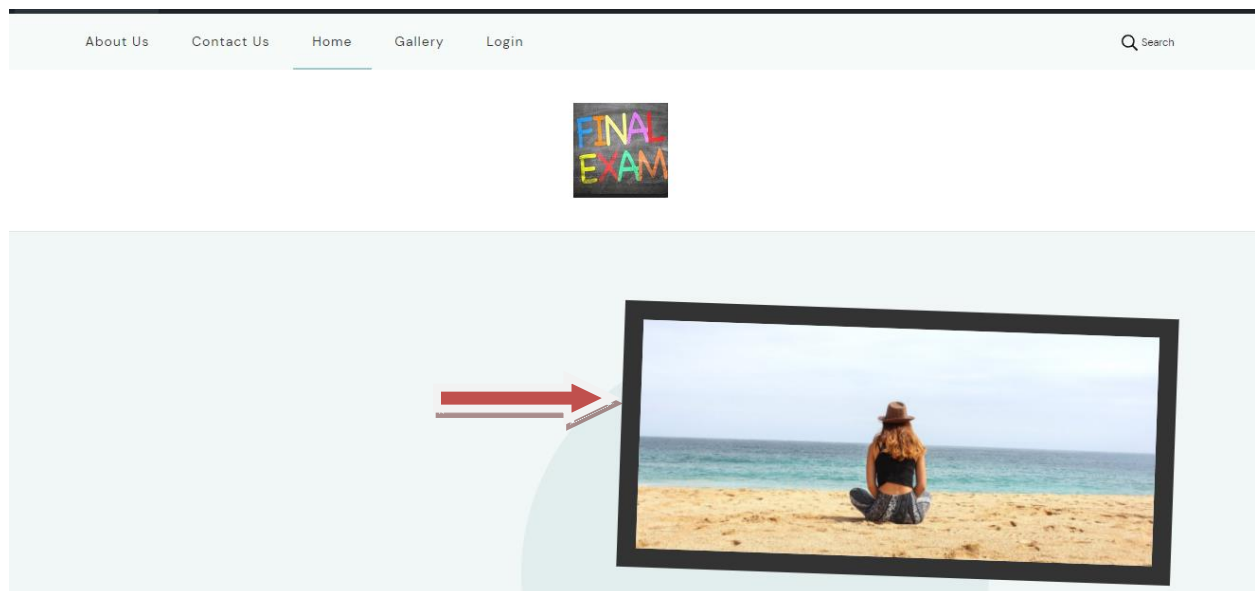

➢ I also change the logo location center to left.

Before

After

12. Add a thumbnail by using hooks.

.

13. Enable pagination for your posts. (Have 20 posts to test this).

Output

Ⓦ 🖥 localhost/finalexam ✎ Customize ↻ 1 💬 0 ✚ New ✐ Edit Page
